Thematic Action Track 5: Financing of education

Global education spending has grown, but is thwarted by high population growth. Managing education during the COVID-19 pandemic and less aid has left education with a major financial gap.

In this context, the first step toward transformation is to urge funders to redirect resources back to education to close the funding gap. Following that, countries must have increased and sustainable financing for achieving SDG 4. These resources must be equitably and effectively allocated and monitored.
Addressing the gaps in education financing requires policy in:

- Mobilizing more resources, especially domestic
- Increasing efficiency and equity of allocations and expenditures
- Improving education financing data

Determining which areas need to be financed, and how, will be informed by recommendations from each of the other four tracks.

**Key issues**

- Adequate and sustainable financing matched to country needs
- Equity and efficiency of spending on education

**Discussion paper & forum**

The discussion paper, prepared by the co-leads of the Thematic Action Track with the support of UN support teams and in consultation with countries and partners, provides latest insights on the financing of education. Join the discussion forum to continue the conversation and share your views.
